# The miracle of Ozone Therapy

BEFORE

WITH adopted son Gordon Haynes (left), and husband George Griffith, and a walking stick, this is how Hyacinth had slowly moved, in extreme pain, on her first visit. (RC)

HYACINTH GRIFFITH, 74, made her first visit to **Ozone Therapy Centres Inc.** in excruciating pain and unable to move independently.

She was held up on either side by her husband George Griffith and adopted son Gordon Haynes, and still used a cane. It was a slow and arduous journey up the stairs.

Hyacinth recalled: "I had some back pain for years, a doctor told me I had a slipped disc, and arthritis. But the pain recently became much worse. By March 11, I could not move."

Her husband of 58 years, George said: "She could not even bathe or dress herself."

Son Gordon remembered: "She used to take about five minutes to move from standing to sitting."

Both of the loving men in her life were very worried about her condition. The couple's adopted daughter, Patricia Parson, was making plans to come down from Canada to care for mum.

That same day Hyacinth decided to go to the **Ozone Therapy Centre**. She recalled: "From the time I was welcomed by Neville and Jan Bayley, I felt my prayers were going to be answered."

Her first treatment left her gasping in pain. "It felt as if something had opened up inside me and the pain spread out. But that meant something was happening to move the pain.

"I came back for a second and third treatment, and each time the pain lessened. My back was a bit stiff (from lack of movement) but by the fourth visit on the ?? *what month??* 21st, I felt like I was 24 years old again. I could move, walk, even dance.

She grinned and busted a ladylike move! "It was a miracle to me! I am very

thankful to God and the Bayleys for the treatments," she said.

So impressed was George, that he started treatments too. "I had a frozen shoulder injury [from] years ago and arthritis. After the therapy, my shoulders felt quite normal."

An athlete from his youth, and still an avid walker and swimmer at 77, he noted that younger men are teasing him about taking rejuvenating pills.

Rejuvenation is one of the benefits of this therapy, since it increases oxygenation of tissues and cells; along with relief of soreness and pain; stimulation of circulation; and strengthening of resistance to diseases.

Manager Jan Bayley explained: "The sweat extruded in treatment rids the body of many toxins and starts the path to healing, with further sessions increasing the effectiveness. But its just a great "feel good", destressing therapy that is wonderful for purifying the skin!"

Managing director Neville Bayley added: "With the increased number of vehicles on the roads today, we are all inhaling a large volume of carbon monoxide, along with other pollutants, thereby increasing the toxins in our body. We are happy that so many people have followed the recommended four-session therapy treatments to rid themselves of toxins, and then continue to have once a month treatments."

So to look and feel your youthful best, or to help your body to heal itself of discomfort and pain, why not call the **Ozone Therapy Centres Inc.** 228-2206, conveniently located on Pine Road, Belleville, St Michael (between 4th and 5th Avenue). Your body will thank you!

AFTER

**AFTER:** Leading the way downstairs earlier this week, Hyacinth Griffith walks at normal pace, pain free and without the support of cane or family. (RC)
